

Hotsuits to feature on The Inventors

Victorian based inventor Chris Lyons will appear on the ABC New Inventors on the 22nd June. Lyons has developed a lightweight wetsuit that features miniature waterproof heaters inserted into recessed pockets which are activated at the push of a button. Chris says the unique non-toxic liquid packs heat to 54 degrees celsius within seconds and allow the user to spend up to 90 minutes longer in the water. The ABC appearance includes a cameo performance from 98 World Champion, Barton Lynch.
