

# Hotsuits Heated Wetsuits set to turn up the heat in the USA!!

HOTSUITS the inventors of the "Heated Wetsuit" and series winner on last years "New Inventors" TV Programme are proud to announce a new addition to their range.

They have just finished developing a "Heated Kidney Belt" which can now turn your existing wetsuit into a "Heated Wetsuit".

The one size fits all Kidney Belt not only takes the chill off getting in the water but it will also keep you warm for up to 1 hour.

Chris Lyons (from Torquay), founder and inventor of Hotsuits says "For only \$89 it gives the customer an inexpensive option to transform their own wetsuit into a Heated Wetsuit and experience

the luxury of being warm in the coldest conditions"

The USA Surf & Dive Industries look certain to embrace Hotsuits and by attending this years Surf and Dive Expo's in Florida it will further promote the concept and gain invaluable exposure on a global scale.

For more information on Hotsuits call Chris on 0417520052 or check out the website [www.hotsuits.com.au](http://www.hotsuits.com.au)
